

*Comforts of home.*

*Supportive Care.*

Setting the table for lunch, tending flowers in a flower box, singing hymns in the living room, enjoying a cup of coffee with friends in the dining room; these are all things that occur in our homes on a regular basis. Unfortunately, all too often these simple but enjoyable past times are lost when an individual enters an Alzheimer's/dementia journey.

In our **Legacy Lane Memory Care Neighborhood**, these everyday events are daily occurrences. The secured, home-like environments are designed to reduce anxiety, while allowing our residents to feel at peace and able to freely enjoy their new homes.

We are passionate about serving our residents in a way that will cultivate all aspects of their lives, with an emphasis placed on cognitive and psychosocial well-being. Throughout the day, we are able to set and maintain healthy energy patterns for the residents by utilizing a dynamic "Daily Rhythms" program, which offers activities that nurture mind, body and spirit.

When the challenges of Alzheimer's disease or related forms of dementia become too great to allow a loved one to remain at home, we help family members to rest easy in the knowledge that they have selected the finest Memory Care provider available. Our specially selected team members are trained to become experts in Memory Care and are placed on consistent care giving teams, adding familiarity and predictability to our residents' lives. Care is offered based on our residents' preferences and historical patterns and we offer clinical services around the clock should our residents require medical care or treatments.

### Our Memory Care Program offers:

- **Personalized care based on a resident's specific needs and abilities**
- **Preservation of the residents' historical habits and preferences**
- **Caregivers specially selected and trained**
- **Multi-faceted daily programs to maintain health energy patterns**
- **Memory-friendly environment that encourages reminiscence**
- **Family-style meal service**
- **A secured outdoor courtyard that encourages interaction with nature**
- **Monthly Alzheimer's/dementia support groups for family members**
